## Key Premises

- Forecast is based on the restructuring and recapitalization of UNIFIN being complete by Oct 31, 2023; Reorganized Unifin is assumed to launch on Nov 1, 2023
- Business operating premises are based on the best knowledge of UNIFIN's management and its advisors regarding:
- Loan market conditions in Mexico to support origination of new loans
- Nafin/Bancomext Warehouse facility to support new originations pursuant to Nafin/Bancomext terms \& conditions
- Gradual expansion of warehouse capacity from external capital market participants after initial 24 months
- UNIFIN's business plan consolidates a runoff of the legacy portfolio ("OldCo"), and commencing new originations through a highly focused, lean business model ("NewCo"), in order to maximize creditor recoveries
- While this presentation references OldCo and NewCo, this characterization is meant for illustrative purposes only
- Unifin is intending to restructure its operations and debts within the same legal entities that exists today and the corporate structure will be maintained
- Cash distributions to Unsecured Funded Debt will be controlled and paid through an administrative trust comprising all current unencumbered assets ${ }^{(1)}$. Waterfall of payments from the administrative trust is as follows:
- OldCo operating expenses
- Debt service for NAFIN and Bancomext take-back debt, until the end of 2028
- $\quad \$ 70 \mathrm{MM}$ to fund new origination and working capital related to new origination
- Payments to Pledge facilities, in the following order:

1. Payment of $50 \%$ of the balance of pending payments
2. After the above is paid, split $50 / 50$ of available cash flow, $50 \%$ to pay down the balance of pending payments to the Pledge facilities, and $50 \%$ for distribution to holders of Unsecured Funded Debt claims

- All remaining excess cash to be distributed to holders of Unsecured Funded Debt claims
- These projections do not include a market-based servicing fee to recover the costs of servicing the secured portfolios

Notes:
(1) Unencumbered performing and past due portfolio and unencumbered assets at exit from Concurso Mercantil and residual value of all bursas, hybrids and pledge facilities

Summary of Key Changes to Business Plan

## Unsecured Funded Debt holders to receive USD \$94M in incremental distributions (from \$260M to \$354M)

## Bancomext \& Pledge Facility payments

## Payment at Emergence

- Will receive payments for $100 \%$ of cash collected from Jan 2023 - Oct 2023
- Will receive payments for $25 \%$ of collections from Jan 2023 - Oct 2023

## Payments after Emergence

- Beginning Nov 2023: Will receive equal monthly payments for its outstanding balance as of Oct 31, 2023; Facility will be paid in full by Dec 2028

## Pledge <br> Facilities

Notes:
(1) These projections do not include a market-based servicing fee to recover the costs of servicing the secured portfolios
(2) Certain Pledge Facilities collection payments are recovered through available collateral rather than the waterfall structure

(*) The major risk exposure portfolio includes loans with non-regular payments for more than 90 days. However, UNIFIN continues implementing a comprehensive past-due collections program to enhance collections from this segment of the portfolio

Notes:
a) Past due rate for the UNIFIN portfolio is $21.91 \%$. Past due rate is calculated dividing Net risk exposure ( $\$ 13,663 \mathrm{~m}$ ) by the Estimated portfolio accounting value ( $\$ 62,368 \mathrm{~m}$ ) which is the Total portfolio $(\$ 61,650 \mathrm{~m})$ plus additional concepts such as origination expenses, insurance provisions and residual receivables for a total of $\$ 718 \mathrm{~m}$. Net Risk exposure is calculated by excluding from the Gross major risk exposure portfolio ( $\$ 46,055 m$ ) those client groups in which the value of the collateral / assets is higher than the Risk exposure to arrive to the Net major risk exposure ( $\$ 41,964 m$ ) and subtracting i) VAT from accrued unpaid rents and other adjustments ( $\$ 9,481 m$ ); ii) deposits already collected ( $\mathbf{P} \$ 108 \mathrm{~m}$ ); ;iii) the value of the assets and collateral securing certain loans ( $\$ 15,644 m$ ); iv) the accounting reserves $(\$ 3,068 \mathrm{~m}$ )
b) IFRS implementation at UNIFIN took place in Q1 2019. Balances above do not consider relevant aspects of IFRS methodology, for example effective interest rate

## Collections (regular and work-out recoveries)

- Regular collections from the loan portfolio. Forecast uses 12 months of historical collections (Jul-22 - Jun-23) to predict future collections until 2030, calculated as a \% of the expected payments based on each structure's specific collateral amortization table
- Considers all clients not included in the work-out recovery plan, to avoid any duplication (2,000+ clients excluded)
- ~8\% average gap between theoretical collections and projected collections over the look back period and the universe of clients considered (i.e. non-work-out clients), which is carried forward in the model with further deterioration adjustments:
- Collection curves adjusted by $2 \%$ in 2024 and $1 \%$ annually for 2025 \& 2026 to account for expected deterioration on a net basis
- Includes residual values for leasing, adjusted to $65 \%$ recovery, paid in cash after 90 days of the loan amortization
- Collections from Work-Out portfolio, per UNIFIN's Work-Out Recovery Plan developed in August 2023 by a combined task force including Portfolio Operations, Work-Out Collections, Legal, Collection Agencies, Assets and advisors:
- Work-out recovery plan created at an individual client / client group level for approx. 2,000 clients that have not made payments in the last 90 days
- Plan reflects $\$ 18.2 B$ MXP in work-out recoveries from a $\$ 52.9 B$ MXP past-due portfolio - $34.4 \%$ recovery
- $\$ 52.9$ B in past due portfolio includes: i) $\$ 46.1 \mathrm{~B}$ in past-due loans as of June 2023; ii) \$1.2B in current loans from past due clients as of June 2023 (work-out plan is created by client / client group to include total exposure to a client / client group, even if some loans might be current); iii) $\$ 5.6 \mathrm{~B}$ in past due loans written-off before and after Aug 2022, where collection actions continue to date
- Planned recoveries are a combination of cash recoveries (one-time and restructured loans), repossession of leased assets, and execution of collateral guaranties, through a variety of negotiation, litigation and other recovery strategies, individually identified for each client / client group
- Timing reflected in the plan takes into account the time required to complete restructuring negotiations, litigation actions and monetization of assets
- Estimated collections from large bullet loans: each loan reviewed individually with the Collections team

## New Originations

- New origination placed under the following terms, based on recent trends and market conditions
- Interest Rates charged to customers based on monthly origination volumes, which includes 100 bp for insurance coverage

| Leasing |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Monthly Origination (USD \$ ${ }^{1}$ ) | \$0-\$13 | \$13-\$26 | \$26-\$39 | \$39+ |

| IRR | 46.7\% | 46.7\% | 46.1\% | 44.9\% |
| Leasing |  | Uniclick |  |  |

- Term: 48 months
- Past due adjustment (the approximate net amount that will not be collected from new originations): $5 \%$ for the first year and $6 \%$ for the remaining 3 years
- Upfront Collections: (i) $10 \%$ down payment; (ii) onemonth deposit at the beginning of loan and (iii) $2.5 \%$ commission
- Residual Value: $25 \%$
- Forecast includes $30 \%$ cash recovery of residual values, with 60\% refinanced over 24 months
- Term: 24 months
- Past due adjustment (the approximate net amount that will not be collected from new originations): $8 \%$ for the first year and $9 \%$ for the second year
- Upfront Collections: (i) $5.0 \%$ commission
(1) All amounts are in constant/nominal USD, considering 18.5 FX

New Originations: Progressive volume ramp-up, focused on strategic sectors and moderate ticket size, in order to maintain high quality of the portfolio

Annual Originations (2023-2036)

## Debt \& Capital Structure

- New originations are funded first with company cash when available and then through a Warehouse Facility:

| Facility | Customer Origination Pledged | Reinvested Collections | Tenor \& Capacity | Interest Rate |
| :---: | :---: | :---: | :---: | :---: |
| NAFIN | 83\% | Yes | Nov 23 - Dec 36: \$250M USD | TIIE + 160 (Nov23 - Dec36) |
| Other <br> Warehouse | 83\% | No | Jul 25 - Jun 2027: \$250M USD <br> Jul 27 - Jun 2029: \$500M USD <br> Jul 29 - Dec 2036: \$750M USD | $\begin{aligned} & \text { TIIE + } 260 \text { (Jul } 25 \text { - Jun 29) } \\ & \text { TIIE }+360 \text { (Jul } 29 \text { - Dec 36) } \end{aligned}$ |

- Cash flows from loans originated through Nafin facility shall be self-contained within a trust and can only be used to originate new loans (i.e., working capital usage prohibited)
- Therefore loans originated through the NAFIN facility are, on average and over the life of the forecast, funded using $29 \%$ of UNIFIN cash and $71 \%$ of WH funding
- Loan principal is paid-off at maturity: Leasing -4 years, Uniclick -2 years

## NAFIN Debt

- Existing debt of $\$ 204 \mathrm{M}$ USD exchanged for new notes
- Interest (6\%) will begin to accrue in November 2023
- Tenure is 13 Years
- Subject to amortization of $20 \%$ in years 1-5, 30\% in years 6-9, and remaining $50 \%$ in years 10-13 (in equal payments for the respective periods)
- Existing debt of $\$ 183 \mathrm{M}$ USD exchanged for new notes
- Interest (6\%) will begin to accrue in November 2028 (i.e., 5 year interest expense holiday for new notes)
- Bullet amortization in 2036 (assumption that amount will be refinanced)

## Use of Warehouse facilities (NAFIN and capital markets)

Combined Warehouse Funding grows to \$1B USD Capacity by Jul-29 and is fully drawn by Mar-32

- Progressive wind-down of OldCo positions and transfer to NewCo to support growth. Detail in next slide
- Forecast includes $3 \%$ annual merit increase

## Service Providers

- Service Providers baseline based on cost-reduction initiatives implemented by the company during 2022-2023
- NewCo operating expenses are expected to scale up year-over-year consistent with new origination volumes, considering a certain proportion of fixed costs and operating leverage

## Insurance

- Continuing insurance costs for current portfolio based on historical norm and portfolio wind-down trend
- Includes insurance premiums for newly leased assets (new origination), scaling-up with growth in origination volumes
